Second Form populated

Note: The master table is quite large so I run a query to pull only the subset of records needed for the form:

ATF Tie Line Checkout

HE	Primary MWH	Secondary MWH	Hourly Adj MWH	Adjusted MWH	Delta	Delta Range	HE	Primary MWH	Secondary MWH	Hourly Adj MWH	Adjusted MWH	Delta	Delta Range	Net NAI
1	25		-20	25	45		1	0		-20	0	20		25
2	23		-20	23	43		2	0		-20	0	20		23
3	26		-20	26	46		3	0		-20	0	20		26
4	24		-20	24	44		4	0		-20	0	20		24
5	21		-20	21	41		5	0		-20	0	20		21
6	20		-20	20	40		6	0		-20	0	20		20

So this query only contains just the records that go with the specific Tie Line. I want to go to the next Tie line. To do that I have a field in my database called Checkout order which is the box with the 1 in the upper left corner.

How do I get to my next set of records which are at the Tie Line Level? This is where I was talking about incrementing my sort order (that's the field I called Checkout order).
