

Select an Equipment ID Number and then the Motor Serial Number from the available options that you would like to view a Maintenance Report for.

Equipment ID Number: 11223344

Motor Serial Number:

Return to Main Menu

12

Non unique values return in combo box

Query set as Row Source for Combo returns the correct values; Notice that "im" is there only once.

Motor_Ser_No	Equipment_ID_Number
12	11223344
19	11223344
67	11223344
im	11223344

SELECT DISTINCT Tbl_Motor.Motor_Ser_No, Tbl_Motor.Equipment_ID_Number
FROM Tbl_Motor
WHERE
(((Tbl_Motor.Equipment_ID_Number)=[Form]![Frm_Select_Motor_Maintenance_Report]![Cbo_Equipment_ID_Number])); - Note for the picture I included the Tbl_Motor.Equipment_ID_Number in the select, but in the actual SQL it is not there. I am aware that have two variables in the SELECT DISTINCT make it not distinct any longer (however it still seems to work)....

I have toggled both Unique Records and Unique Values Yes / No with no effect

Field	Motor_Ser_No	Equipment_ID_Number	Motor_Manufact	Motor_Type	Motor_Cat_No	Motor_Mod_No
Tbl_Motor						
Show:	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
