

Database Notes

11 July 2006
11:25

Every printer has a Specific Printer Number which is how It is identified on the network i.e. P2083 etc

The reason for this Database is so that when someone calls up saying that there printer is out of ink we look up the Printer Number and it gives us relevant information regarding What Printer it is and what Ink cartridges it takes and if we have them in stock.

Forms

11 July 2006
16:17

Want to be able to view the information using something like this

When the Model Number is created this search is created and produced for the user showing the current stock information.

Ink : Select Query								
	ModelNumber	ink	Unit Price	Stock Level	Supplier	Max	Min	Info
▶	S450	BCI 3BK	£1.30	20	JAD	60	27	
	S450	BCI 3MG	£1.30	29	JAD	60	20	
	S450	BCI 3Y	£1.30	33	JAD	50	20	
	S450	BCI 3C	£1.30	32	JAD	60	20	
*								

Also need to think about getting the P Numbers in the combo box and being able to search using that.

Need a form to Add Printers but have everything on one form with a save button using list boxes or combo boxes for set choices, with the add record if not found function
