

The screenshot displays the Microsoft Access 2010 interface. The main window is titled 'Form Design Tools' and shows the design view of a form named 'frm_LabelsToPrint_Config'. The form has a title bar 'Retail Sales' and a subtitle 'frm_LabelsToPrint_Config'. The form body contains two text boxes: 'BIMNumber:' and 'Qty:'. The left pane shows a list of forms, and the right pane shows the 'Property Sheet' for the form.

The 'Property Sheet' on the right shows the 'Format' tab selected. The 'Record Source' is 'tbl_LabelsToPrint_Config'. The 'Recordset Type' is 'Dynaset'. The 'Fetch Defaults' property is set to 'Yes'. The 'Filter' property is set to 'No'. The 'Filter On Load' property is set to 'No'. The 'Order By' property is set to 'Yes'. The 'Order By On Load' property is set to 'Yes'. The 'Data Entry' property is set to 'No'. The 'Allow Additions' property is set to 'Yes'. The 'Allow Deletions' property is set to 'Yes'. The 'Allow Edits' property is set to 'Yes'. The 'Allow Filters' property is set to 'Yes'. The 'Record Locks' property is set to 'No Locks'.
