When text0 on the main form is double clicked the pop up form opens at the right position

Form1 : Form

Text·:

Pup up Form

Field2
wefwef

(AutoNumber) *
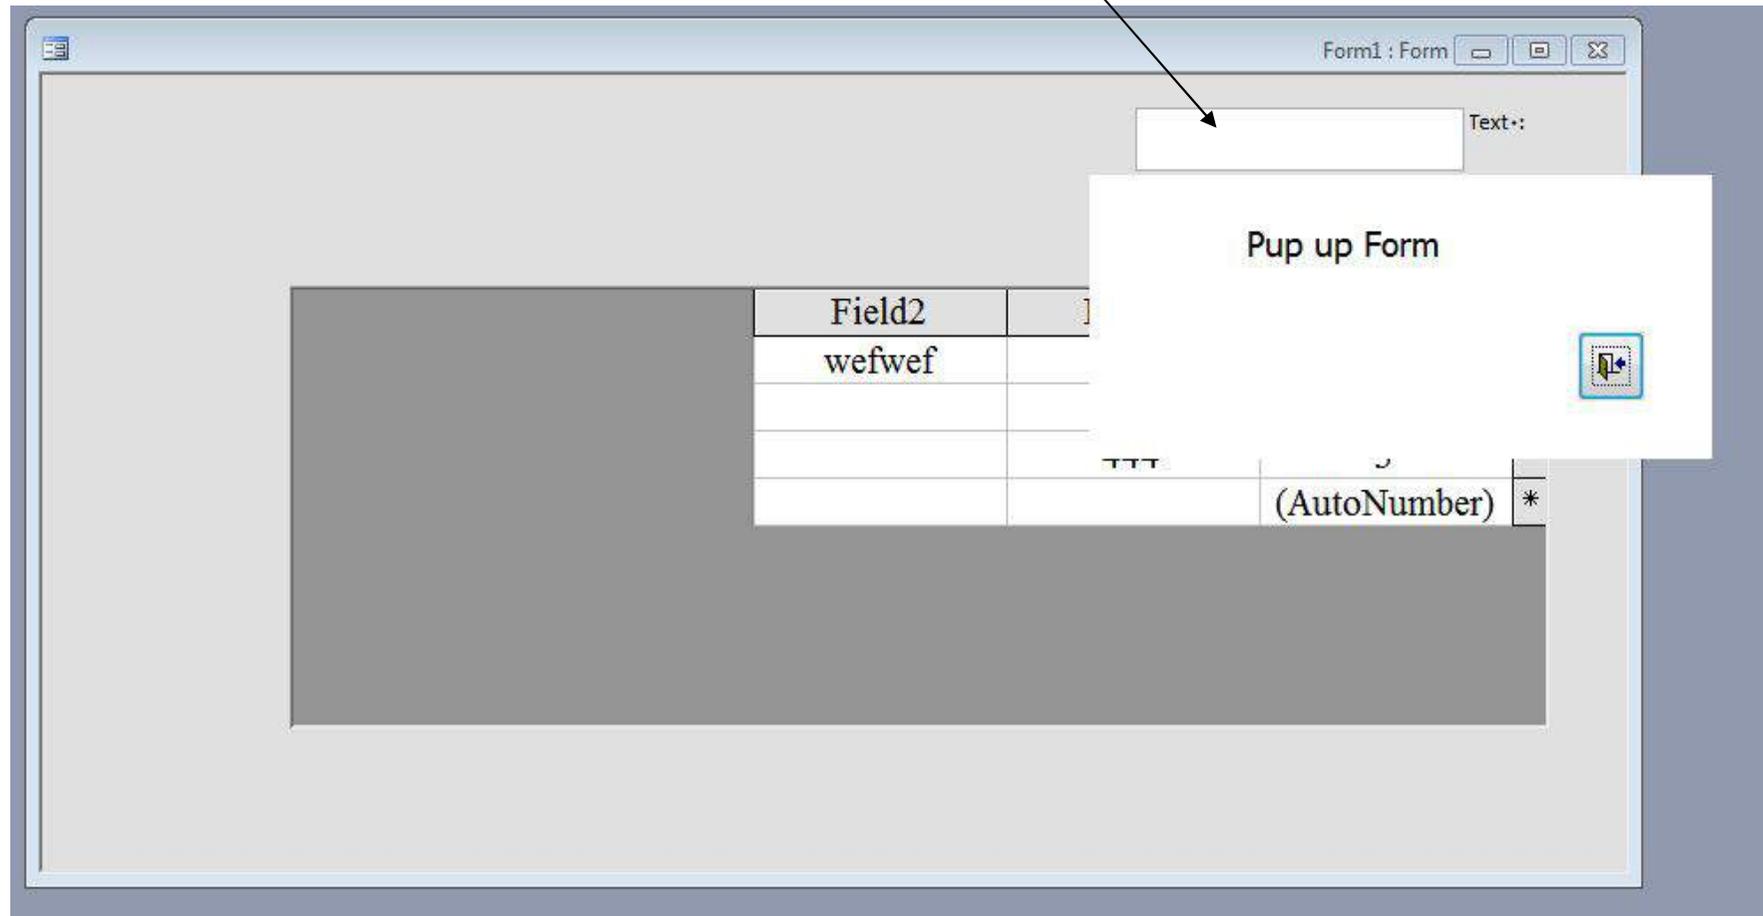

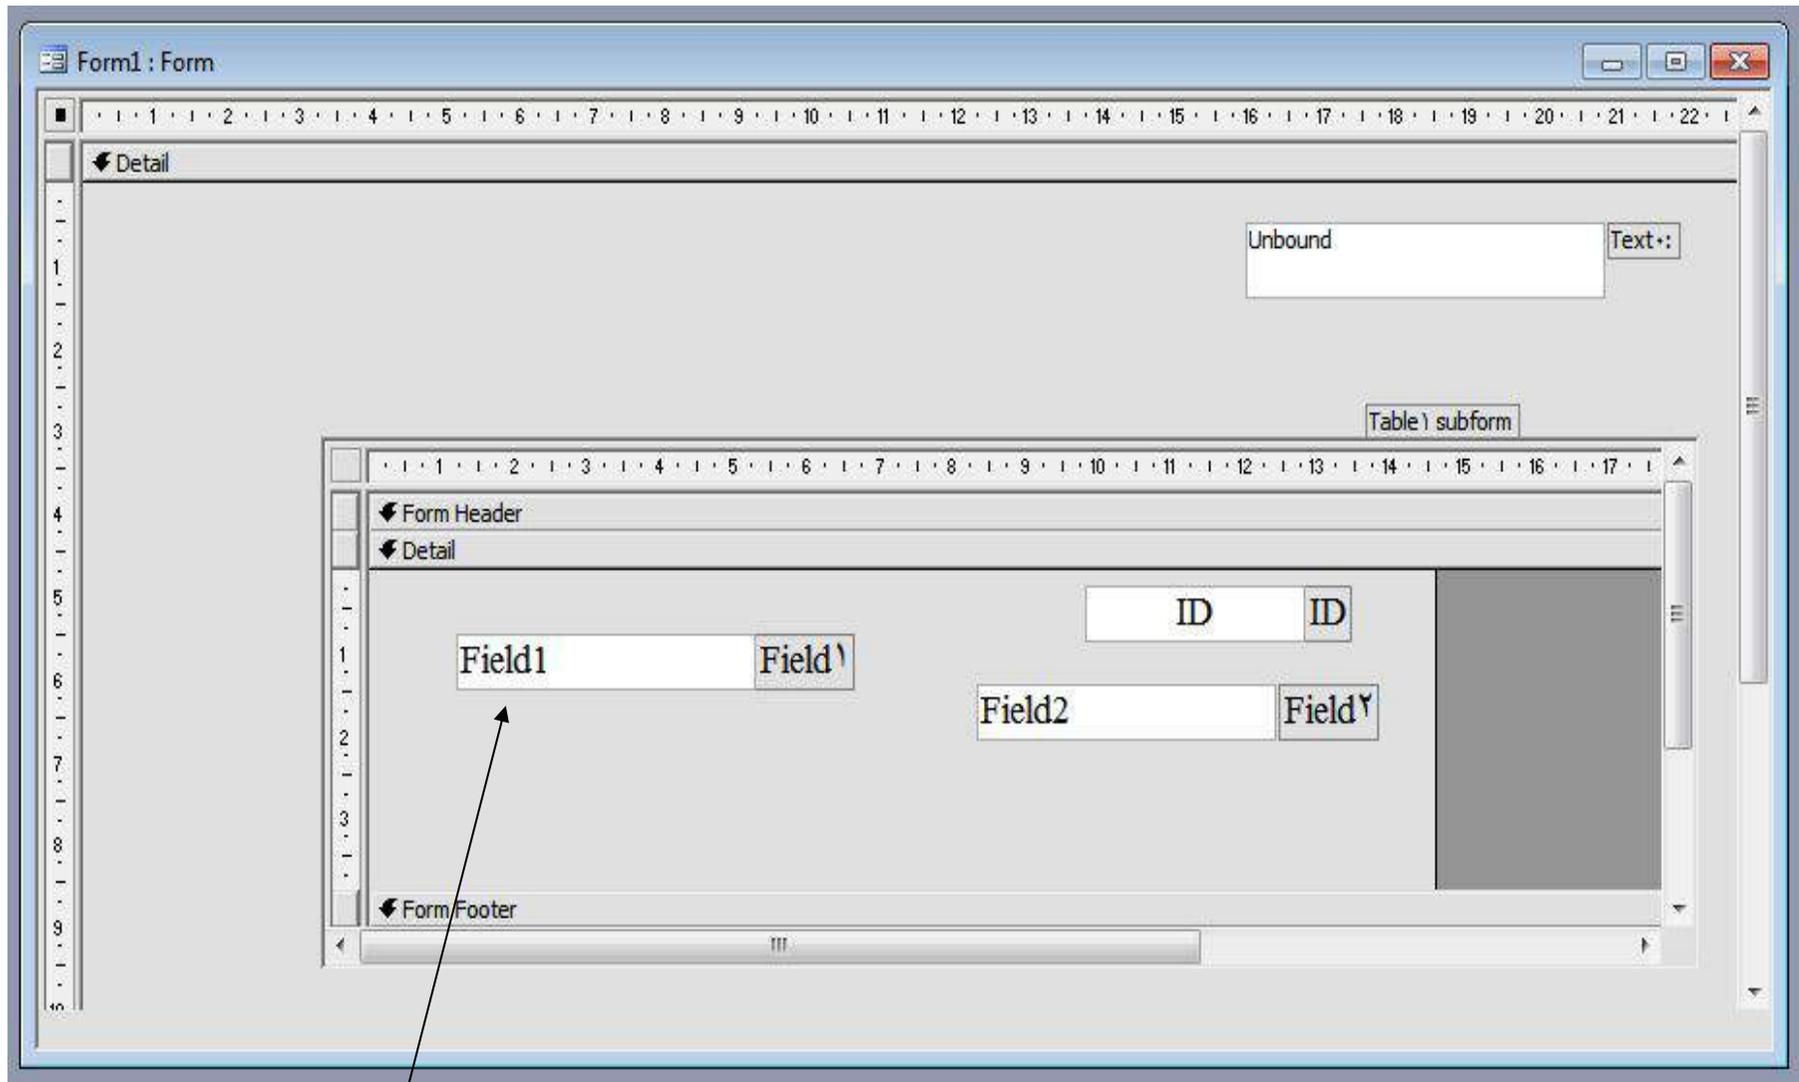

Position of Field1 of the subform
in design view

Form1 : Form		

Text·:

Table 1 subform

Field2	Field1	ID	
wefwef	22	1	◀
	333	2	
	444	3	
		(AutoNumber)	*
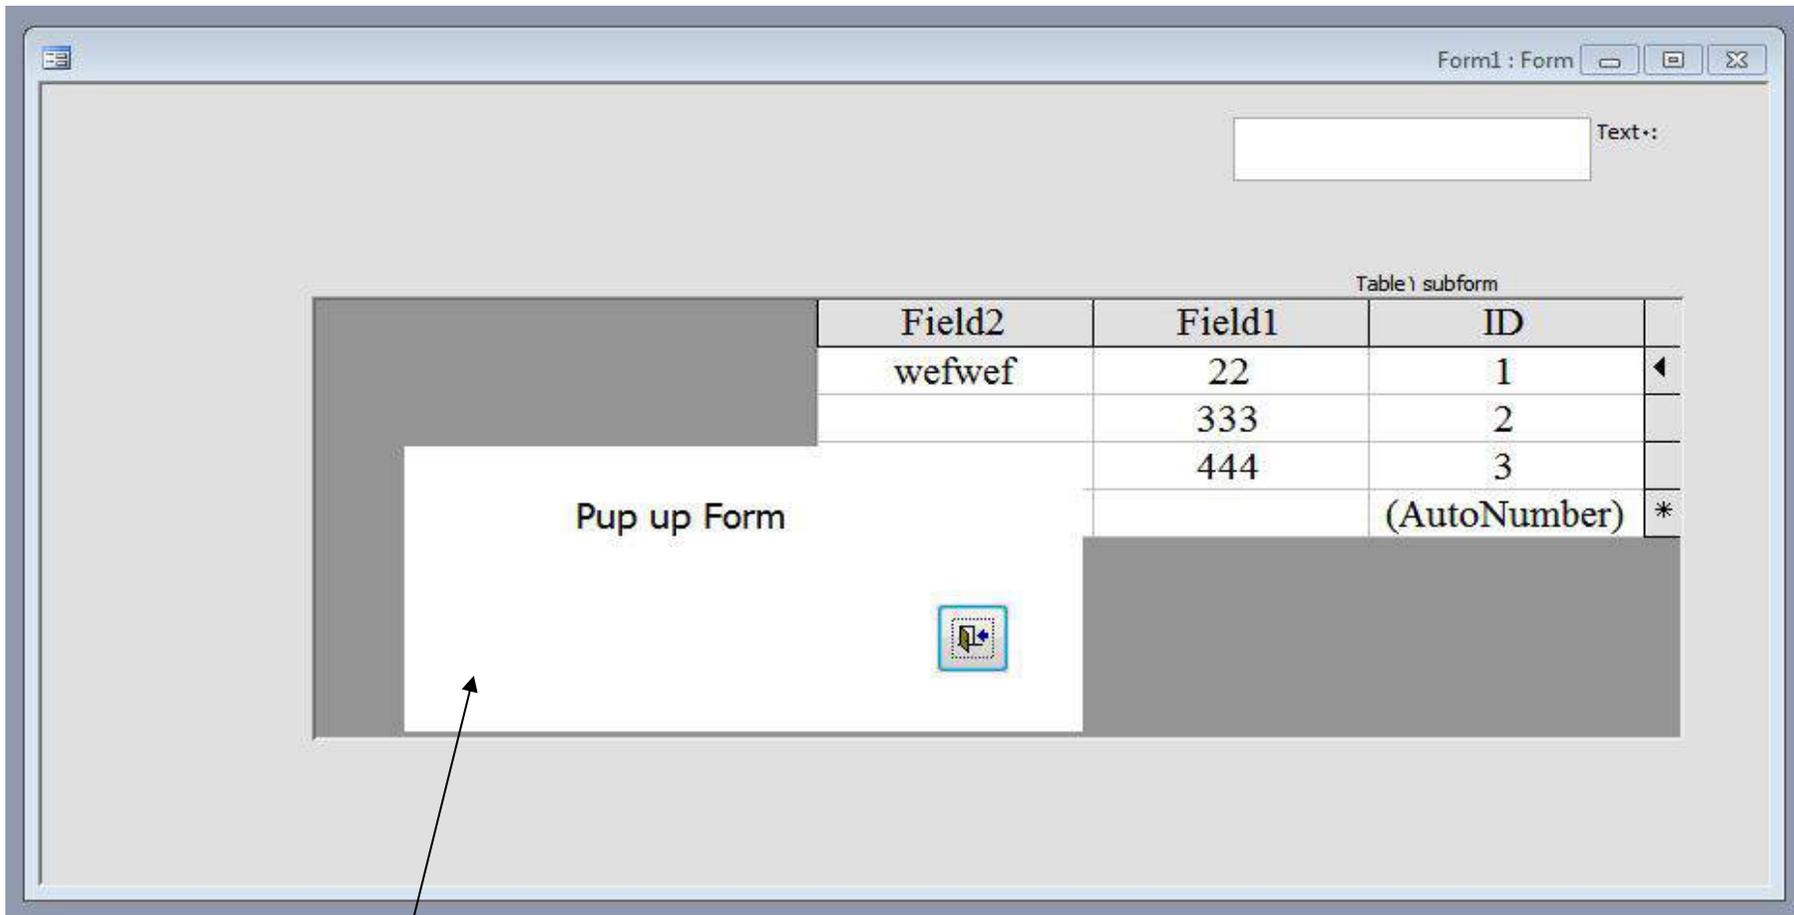

Pup up Form

When Field1 is double clicked, the pop up form is opened at the position where field1 is on the design view. No matter which record is selected, the pop up window opens at the same position.

I need the pop up form to open below "22" when field1 of record 1 is double clicked and so on.
