I have designed my Data Base on Day rate basis. If the plant has worked for more than 6 days I want the weekly rates to be applied as per Table 2

Note

1) If the Plant no = "222 " check for Date < or = 06-01-14 then Day rates should be applied

2) If the Plant is hired for > 06-01-14 but < or = 14-01-14 then Weekly rates should be applied

3) If the Plant is hired for > 14-01-14 then Monthly rates should be applied

When I click the command button I want the rates to be automatically calculated and updated as per the above three conditions

Eagerly waiting for your response.

Regards,

Affan
