

Result rules

1. When a startno have got at least 3 judges (majority) when counting they should got a rank
2. If two startno have majority in the same counting-column, the startno with highest count will be placed first
3. If they have the same count the startno with the lowest sum of the three lowest judges will be first and an x set into the used columns.
4. If point three is equal the value of the lowest 4 will be and if this sum is the same use the all 5 sum
5. If you can't split them they will get the same rank.
6. It is good if you can set a x for what sum you have used to split them

	Judge					Counting					Plac
Startno	A	B	C	D	E	1	1-2	1-3	1-4	1-5	
101	1	2	1	4	4	2	3	--	--	--	2
102	2	3	2	3	2	0	3	--	--	--	3
103	3	1	3	1	1	3	--	--	--	--	1
104	4	4	4	2	3	0	1	2	5	--	4

	Sums
