# IGCSE/GCSE Mock Results

All subjects have been tested and all calculations are correct (supposing that my weighting data is correct). If you have spotted an error here please let me know as this procedure is at the heart of my program. This particular feature took me about three months to get correct so I hope that it is correct and meets the required standard for dealing with Mock examination data input.

All Mock data will now be passed on to the Enter Mock IGCSE/GCSE Examination Subject Data, Form. Here you will be able to assign a pass of 9 to U for each student and obtain total scores plus averages. You cannot edit the Mock results on the Mock data Form, you would have to return to the original subject and make any changes there. All is left now is Print the required data such as a class or an individual student's performance. I hope you find this collection of data about each student useful.
