What I really need is a title that says:

Funded/Completed: So the 1 Completed record is included with Funded records. So, the total should be 8.

Yet, I will need a new heading for the "Pending" records.

I'm not sure what I'm asking can be done – I don't know where I would put a heading for Pending.

My boss gave me this example for how she would like it to look:

Grants Awarded (status = funded or completed)

Grants Pending (status = pending)
