

The screenshot shows the Microsoft Access 2007 interface. The ribbon at the top includes the 'Home' tab, which is active, and sub-tabs for 'Create', 'External Data', and 'Database Tools'. The 'Home' ribbon contains groups for 'Views' (with a 'View' button), 'Clipboard' (with 'Cut', 'Copy', and 'Format Painter' buttons), 'Font' (with various text formatting buttons like Bold, Italic, Underline, Color, and Background Color), 'Rich Text' (with bullet point and numbering options), and 'Records' (with 'Refresh All', 'New', 'Save', 'Delete', 'Totals', 'Spelling', and 'More' buttons). On the left, the 'All Tables' task pane shows a list of objects: 'Table1 : Table' and 'Form1'. 'Form1' is selected, and its design view is displayed in the main workspace. The design view shows two fields: 'Field1' and 'Field2'. 'Field1' is associated with a text box containing 'Data 1', and 'Field2' is associated with a text box containing 'Data 2'.
