# Upsizing Wizard Report

---

## Database

**Microsoft Access Database:** O:\Bellingham\Intranet\Current Projects\Databases\Product Database\ProductDatabase.accdb

**SQL Server Database:** cription=newodbc

---

## Errors

### Table: tblProductInfo

Table was skipped, or export failed

---

## Upsizing Parameters

### Table Attributes to Export

- |   |                                |
|---|--------------------------------|
| <input checked="" type="checkbox"/> <b>Indexes</b>          | <b>Table relationships:</b>    |
| <input checked="" type="checkbox"/> <b>Validation rules</b> | Upsized using triggers         |
| <input checked="" type="checkbox"/> <b>Defaults</b>         |                                |
| <input type="checkbox"/> <b>Structure only, no data</b>     | <b>Timestamp fields added:</b> |
|   | No tables                      |

### Modifications to Existing Database

- |   |  |
|---|--|
| <input checked="" type="checkbox"/> <b>Attach newly created SQL Server tables</b> | <input type="checkbox"/> <b>Save password and user ID with attached tables</b> |
|---|--|

### Client/Server Modifications

- |  |  |
|--|--|
| <input type="checkbox"/> <b>Create a new Access client/server application.</b> | <input type="checkbox"/> <b>Save password and user ID with application</b> |
|--|--|

---

## Tables

---

**Table: tblProductInfo**

**Microsoft Access**

**SQL Server**

**Table Name:** tblProductInfo

**Attached Table Name:**

**Aliasing Query:**

**Validation Rule:**

Skipping table 'tblProductInfo'...
